Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the air pressure sensor of claim 13 must be shown or the feature canceled from the claims.

No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3617

2. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because it appears from the description on pages 1-5 that these figures show the prior art and not the invention. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: The term "Related Art" in paragraph 0002 and in the Brief Description of the Drawings is objected to as inadequate and should be changed to "Prior Art." It is not clear if "related" would contemplate known embodiments or other embodiments of the claimed invention, but it appears that the rims described on pages 1-5 in reference to figures 1 and 2 are prior art rims and the specification should be amended accordingly.

The term "normal rim" in paragraph 0003 should be changed to - -conventional- - because the limits of the term "normal" are not known, and because there are hundreds of known styles of wheels and each of them could be considered to be "normal."

Appropriate correction is required.

Art Unit: 3617

4. The disclosure is objected to because of the following informalities: Phrases such as "trough 37 outer side-wall 39" found in paragraph 0015 are confusing. The "37" should be deleted to conform to current office practice. Note also the phrase "valve 310 stem 312" in the same paragraph.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-14 are allowable over the prior art of record.

Priority

6. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on April 4, 2003. It is noted, however, that applicant has not filed a certified copy of the Japanese application as required by 35 U.S.C. 119(b).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show multi-piece rim constructions and valve stems in a rim.

8. This application is in condition for allowance except for the following formal matters noted in paragraphs 1-4 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3617
